

## DEFINITIONS

### 1 Clear responsibilities

I know what my responsibilities are; I understand what I can accomplish alone and where I can collaborate.

### 2 Shared process

We have a shared understanding of our process.

### 3 Experienced in software projects

Our team has previous experience delivering projects like this one.

### 4 Experts in our field

The team includes experts in the subject matter of the product.

### 5 Clear, shared vision

There is a vision for this product and it has been clearly communicated. Team members have a shared understanding of what they're trying to achieve.

### 6 Talent is valued

I feel that the work I do is respected and my contributions are valuable.

### 7 Achievement

My team achieves something on a regular basis.

### 8 Debate & decide together

We are comfortable voicing our opinions, debating and deciding together on this team.

### 9 Smallest whole

Our team is thoughtfully planning the incremental delivery of a product that delivers value to users and the business with each increment.

### 10 Provide unique value

Our team understands the attributes of this product that will compel a particular group of users to embrace this product over other options.

### 11 Measuring success

This team knows how to measure how we're doing against the goals we've set.

### 12 Self-sustaining

Enough people are interested in this product that it can continue to exist.
